NOTES: Member	<ul> <li>a. Measured at the discharge terminal point of the compressor package in accordance with ISO 1217, Annex E ACFM is actual cubic feet per minute at inlet conditions.</li> <li>b. The operating pressure at which the Capacity (Item G) and Electrical Consumption (Item K) were measured for this data sheet.</li> <li>c. Maximum pressure attainable at full flow, usually the unload pressure setting for load/no load control or the maximum pressure attainable before capacity control begins.</li> </ul>

\*\*For Variable Speed, this value combines 3 Measured Points: (25% x 40%LOAD) + (50% x 70%LOAD) + (25% x 100%LOAD) f. Pressure Ratio = the ratio of discharge pressure to inlet pressure, as determined at full-load operating pressure
