

SUNSKY®

Corrugated Polycarbonate Skylight and Sidelight Panels

AGRICULTURE

CONSTRUCTION

Overview

SunSky corrugated polycarbonate panels stand up to punishing exterior applications and offer multiple advantages over traditional fiberglass corrugated panels. SunSky provides up to 20 times greater impact resistance, warranted protection against yellowing, excellent load ratings, and the highest resistance to wind uplift—outstanding properties confirmed by independent laboratory tests and in installations worldwide since 1984.

SunSky is available in soft white for maximum light transmission without glare, as well as clear and a range of colors to filter light or reduce heat loads.

www.palram.com

Main Benefits

- Virtually unbreakable
- Self extinguishing
- High transmission of natural daylight
- Retains optical clarity over time
- Engineered to stay tough over a wide temperature range (-40°F to 210°F)
- Easily and safely Installed
- 10-year limited warranty (loss of light due to yellowing; damage due to hail)
- Hail and wind resistant (*FBC approved*)
- 100% UV protection

Typical Applications

- Skylights for corrugated metal roofs
- Sidelights
- Roofing
- Ridge lights (using SunSky ridge cap)

Looking for reduced glare and less shadows?

Unlike competing products, Ask for SUNSKY **SoftWhite** isn't just white PC with less white tint. It's advanced technology, proven to provide 100% diffusion and 85% light transmission. Soft White spreads light and reduces harsh shadows and glare.
