FOR IMMEDIATE RELEASE: Digital Check Consolidates Cleaning Cards After SmartSource Acquisition

AUBURN, Maine – March 10, 2017:– KICTeam Inc. in partnership with Digital Check Corp., announced today that their Digital Check branded cleaning cards are approved for use with all Digital Check scanners. The Waffletechnology® cleaning card was the product of joint development with Digital Check Corp and KICTeam. With the 2016 acquisition of the SmartSource line of check scanners from Burroughs, Inc., Digital Check significantly broadened their product lineup. The consolidation of both brands meant the re-evaluation of the cleaning card offerings to determine the ideal product for their expanded line of check scanners.

KICTeam, working with the engineers at Digital Check, have qualified the Digital Check Cleaning Cards with Waffletechnology for all the SmartSource check scanners. In the coming days, we will be introducing rebranded products designed to effectively clean both Digital Check's legacy scanners and the SmartSource line of check scanners.

"We are extremely pleased with Digital Checks qualification process of this product and it's effectiveness on all Digital Checks scanners," said Jimmy Timmins, Business Development Manager, Financial Division at KICTeam. "We now have one approved product across the entire brand." The Digital Check branded cards have been shown to remove more dirt and debris than other products due to its patented textured design and effective, environmentally friendly, cleaning agents.

About KICTeam

KICTeam is the world leading expert in technical device cleaning with a focus on payment and transactional technologies. We are focused on producing the best cleaning regimens, effective agents and disposable tools that ensure optimal device performance while reducing service costs - ultimately improving the customer experience.
