Recommended Usage:

The frequency of cleaning is dependent on the volume of currency accepted and location of the acceptor. Weekly usage of this cleaning product is recommended to increase and maintain high acceptance rates.

Directions:

1. Insert cleaning card into cash acceptor.
2. The card will be accepted and rejected automatically.
3. Repeat this process several times for proper cleaning.
4. For additional burnishing of transport rollers, insert and HOLD cleaning card while the acceptor pulls the card.
5. Discard used card properly.

Waffletechnology®

The cleaning waffles create a spring-loaded cleaning system to reach into recessed areas of the acceptor, correcting acceptance errors due to dirty lenses and sensors, while effectively cleaning drive rollers and belts.
