

**WE SEE THE POTENTIAL IN PARTS.**

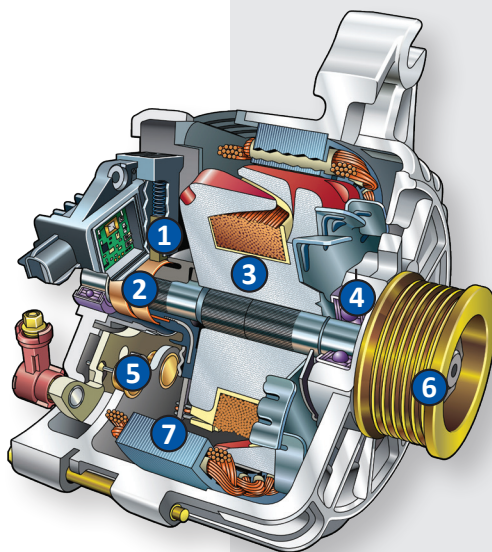

## **HIGH QUALITY REMANUFACTURED STARTERS / ALTERNATORS**

- Continuous improvements made to OE designs
- Every unit is end-of-line tested prior to shipping
- Comprehensive import and domestic application coverage
- State-of-the-art research & development and endurance testing labs
- Award winning product quality, customer service, tech support, and category management
- Branding opportunities include unique private and co-branding programs
- OE clutch pulleys replaced with Litens® Brand OAD™ decoupler pulleys
- Replacement components are 100% new

## REMANUFACTURED ALTERNATOR

1. New brushes extend the life and reliability of the alternator
2. For maximum brush contact and consistent output, slip rings are precision polished, turned or replaced
3. Rotors are electronically load tested for maximum output, ensuring long service life
4. New motor-grade bearings are lubricated with extreme temperature grease and double sealed for reduced heat and friction
5. Rectifiers are 100% load tested or replaced with new, ensuring longer life under extreme conditions
6. Clutch pulleys are upgraded to higher quality decoupler pulleys
7. Stators are electronically load tested for insulation integrity, ensuring maximum output

## REMANUFACTURED STARTER

1. Contacts are resurfaced or replaced with new for sure starts
2. New bushings for maximum wear, performance and long life
3. Drive assemblies are remanufactured with new springs, rollers and covers to ensure positive starts in the most extreme conditions
4. Armatures and commutators are precision machined and electronically tested to provide consistent starting performance
5. New brushes extend the life and reliability of the starter
