

SPECIALTY UNITS

Single Wire Hookup

BBB Industries® Single Wire Alternators are used for a variety of applications, including Agricultural and Industrial applications. In addition, the Single Wire Alternator can be used on street rods and newer modified automobiles where the owner wishes to keep the wiring plan simple. The Single Wire system will provide turn-on and shut-down automatically with engine operation. The Single Wire Alternator can also be used for modifications and conversions on just about any type of vehicle or equipment.

The following BBB Alternators are supplied with the single wire hook-up configuration:

BBB No.	Volts	Amps	"R" Terminal
