- No additional training or tooling costs
- Active system & performance follow-ups
- Additional service warranty

The Preventive Guardian

Keep your focus on your production process and equipment, while we help you maintain your compressed air system needs to reduce your overall costs from maintenance to administration, while maintaining continuous air supply availability for your production process.

**Are you concerned with high breakdown costs and production uptime?**

Our technicians can spot a developing problem and propose a course of action to prevent a future breakdown and unexpected downtime.

Additionally, our customers with Guardian coverage experience, on average additional 16 days of uptime each year.

**Are you concerned about certifications and keeping records of your process?**

We will take care of providing you detailed maintenance reports after each service intervention and keep them stored. Additional reporting and tracking will be available through our monitoring system where you can track equipment usage, records and even energy consumption.
