

Daylighting & Hydro Excavation Services

We are the professional alternative for your excavation needs.

Safer. Cleaner. More Precise.

In many industrial and municipal settings, excavators have to make a “best guess” about the nature and location of pipelines, utilities, service pits and other hidden obstructions —making conventional manual or machine digging a significant risk to underground infrastructure and the surrounding ecosystem. But now, there’s a better way: Clean Harbors Daylighting & Hydro Excavation.

Safer.

Our strict safety protocols mitigate risk of damage to unknown or congested underground infrastructure and injury to on-site personnel.

Turnkey Hydro Excavation Services.

Clean Harbors' Hydro Excavation delivers a safer, cleaner, more precise methodology for your daylighting and other excavation projects. But it takes more than a better methodology to deliver great excavation solutions.

Our world-class Daylighting & Hydro Excavation Services utilize industry-leading assets, an expert team of qualified personnel, a turnkey infrastructure, and an eye for innovation to uniquely manage and execute every phase of the excavation, transportation and disposal process.

For more than 35 years, Clean Harbors has been a leader in environmental services. We apply our vast wealth of knowledge and experience to efficiently solve the daylighting and excavation challenges for today's business.

Safer, cleaner, superior hydro excavation from Clean Harbors.

Choose Clean Harbors' Hydro Excavation for:

- Safe, reliable and efficient hydro excavation, every time
- Excavation projects with known, suspected or unknown underground utilities
- Excavation projects with the potential for impacted or hazardous soil
- Excavation in or around fiber optic cables or other highly sensitive underground materials
- Daylighting/Potholing, Pier Holing, Bell Holes, Trench Boxes/Shoring Boxes, Rig Cleaning, Tank Cleaning, Spill Cleanup, Ditching & Trenching
- Interior plant applications including Pipeline, Terminal and Dry Tank Cleaning, Pit Cleaning, Trench/Culvert Cleaning

Cleaner.

We minimize impact to the surrounding environment and require less backfilling and site restoration.

A set of services not found elsewhere.

Clean Harbors can truly turnkey your project, making sure that the ancillary services that can delay or extend a project are addressed up front. Our end-to-end solutions include:

- Provisional Water Supply
- Waste Disposal
- Hydro Testing
- Pigging
- Support Equipment (Portable Tanks, Vacuum Trucks, Vacuum Boxes)

A team of qualified experts.

Every Clean Harbors Hydro Excavation project is conducted by an expert team of qualified operators and technicians. Experienced in sensitive-site excavation and the latest technology, Clean Harbors' expert team of specially trained and qualified personnel set the industry standard for water-propelled excavation safety and precision. Our outstanding safety record speaks for itself, exceeding all regulatory requirements.

A cost-effective excavation solution.

Our Hydro Excavation offers ten times the excavation rate of manual digging. Coupled with lower associated insurance costs and liability exposure, Hydro Excavation offers a realistic, cost-effective approach to even the most complex and challenging excavation scenarios.

A better way to keep on-line.

Damage caused by conventional excavation methods is costly to repair, and can have far-reaching consequences for operations, including prolonged downtime, a decrease in production and an increase in insurance rates. By comparison, our Hydro Excavation can safely and effectively be used for interior plant applications without compromising plant efficiency and productivity.

More Precise.

Our experts can pinpoint areas of excavation with greater accuracy and sensitivity compared to mechanical methods.

Clean Harbors

Commitment. Leadership. Confidence.

Clean Harbors is North America's leading provider of environmental, energy and industrial services. We serve over 250,000 customers, including a majority of Fortune 500 companies, thousands of smaller private entities, and numerous federal, state, provincial, and local governmental agencies.

Founded in 1980, Clean Harbors has grown to be the leading and most trusted name for a broad range of services such as end-to-end hazardous waste management, emergency spill response, industrial cleaning and maintenance, and recycling services.

Through its Safety-Kleen subsidiary, Clean Harbors is also North America's largest re-refiner & recycler of used oil and a leading provider of parts washers & environmental services to commercial, industrial and automotive customers.
